SUMMARY

Senior iOS Developer with 6+ years of experience building high-performance apps using Swift, SwiftUI, and UIKit. Skilled in MVC, MVVM, VIP, and MVVM-C. Proven track record of leading features that boost engagement, accuracy, and performance. Agile-savvy (Scrum, Kanban, XP) with strong Git expertise. Focused on crafting intuitive interfaces and optimizing app efficiency.

EXPERIENCE

Senior iOS Engineer

Sebratec

December 2022 - Present

- Architected and launched a loyalty program module using Clean Architecture, boosting user engagement by 150%.
- Resolved 100% of critical crashes, enhancing app stability from 3.2 to 4.7 stars through memory leak diagnosis.
- Accelerated development velocity by 50% with SwiftUI adoption, reducing feature delivery time from 4 weeks to 2 weeks.

Senior iOS Developer

Turing

August 2022 - November 2022

- Spearheaded the optimization of the StubHub sales module, enhancing user experience and increasing listing completion rates by 35%.
- Implemented strategic unit test coverage expansion, boosting code reliability by 40% through continuous refactoring with XCTest.
- Migrated legacy interfaces to SwiftUI, reducing maintenance overhead by 30% and improving visual consistency across the platform.

Senior iOS Engineer

Capgemini

July 2021 - June 2022

- Spearheaded the optimization of authentication performance, achieving a 65% improvement in login times.
- Enhanced QA processes by 40% through the implementation of Firebase-powered feature flags.
- Developed a flexible server-driven UI architecture, increasing deployment speed for interface updates by 70%.

Mid iOS Developer

Dextra Digital

October 2019 - June 2021

- Developed geolocation-based news features, boosting app downloads by 50% and doubling user session duration.
- Improved code reliability by 75% through enhanced test coverage using XCTest and Quick/Nimble.
- Created a cross-application UIKit design system, reducing UI inconsistencies by 80% and streamlining design implementation.

Junior iOS Developer

Verité Soluções

July 2018 - September 2019

- Developed and deployed three interconnected iOS applications, enhancing business management for over 500 operations.
- Improved app performance by 45% through Firebase Analytics, significantly reducing load times.
- Increased user engagement by 40% via geolocation and push notifications, driving higher app usage.

EDUCATION

Bachelor of Computer Science

Universidade Federal do Maranhão (UFMA) • 2011-2017
